My first pair of skates

My first skates I had were very nice and sharp. I went on the lake the second day I got them; but I could not stand on them and ~~they were very nice and very nice, very high~~ I could not get them on becaus I did not know how ~~to~~.

They go all with now. One of my skates would not stay on and ~~they~~^{it} would go off my skate. I would run on the ground make them dull and would make me tumble over and hurt my self. Then they went all ~~up~~^{after} while one time my skates and another boy were going to have a race and that boy that was going to race with me fell a little from and hurt him. His name was V. E. and he did not want to race ~~my~~^{me} more. My skates do not go good now.
